

The real innovator in rubbish reduction.

With growing awareness of the damage incinerators do to our atmosphere and landfills expanding at a frightening rate you owe it to the planet to take up less space.

The InSinkErator® Trash Compactor takes care of a mountain of packaging waste by compressing it to around a quarter of its original volume.

The unit comes with a stainless steel fascia on a black cabinet, and it will easily fit in most kitchen under-bench areas.

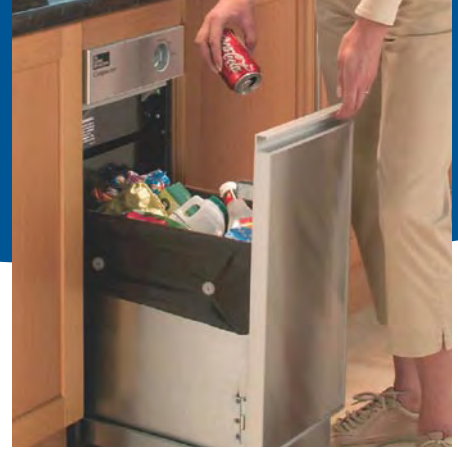

InSinkErator® Trash Compactors are priced from RRP\$1999 with a 1 year parts and labour warranty and are available from most major appliance and plumbing retailers.

InSinkErator® Trash Compactor

Simply put packaging waste into the compactor bag, close the drawer and switch on. The InSinkErator® Trash Compactor automatically stops when the cycle is complete. The drawer cannot be opened when in use, a removable locking safety key is provided. The compactor may be used 'free standing' or in a fitted kitchen where it fits comfortably under a regular work surface.

High praise for the InSinkErator® Trash Compactor from a multi award winning professional.

"I recommend the InSinkErator Trash Compactor to all my clients because it's the logical choice. In order to achieve design excellence a kitchen area should be practical and functional, the Trash Compactor is both, providing everyday convenience to all who use it.

In order to achieve design excellence a kitchen area should be practical and functional, the Trash Compactor is both.

I also acknowledge the environmental struggle to effectively dispose of waste materials and the ongoing issues related to landfill sites, and although the InSinkErator Trash Compactor can't solve all our problems, it seems to be one of the best solutions available."
